SKILLS

- **Languages**: Python, JavaScript, C, C++, Bash
- **Technologies**: HTML, CSS, Node.js, React, Tailwind CSS, Linux
- **Databases/Tools**: MySQL, Git, GitHub, Figma, Nmap, Wireshark, Dirb, Netcat
- **Soft Skills**: Problem solving, Team management, Time management

PROJECTS

Airline Reservation System | GitHub — Jan 2025 - Feb 2025

- Architected a real-time virtual Airline reservation system using Python (Tkinter GUI), supporting concurrent users with low-latency per session.
- Engineered an reservation workflow, including Seat management, flight tracking.
- Developed complete GUI interface for flight reservation using python's module named Tkinter , providing excellent GUI interface for users with minimal design.
- Storing all the data simultaneously using MYSQL
- **Tech Stack:** Python, Tkinter, MYSQL

Prep Genie | GitHub — Jan 2026

- Built an agentic AI career-coaching platform for the HACK AI hackathon, combining LLM-driven guidance with structured user profiles.
- Developed complete AI Automated corporate focused CV analysis that provides detailed analytics of the CV whether the CV fits as of companies requirement or not.
- Engineered under 24 hours and currently used by 20+ people regularly for testing and everyday purposes.
- **Tech Stack:** MySQL, Huggingface, Python, HTML&CSS ,Git

Shift Pin | GitHub — July 2026 - Aug 2026

- Built a staff attendance and shift-tracking PWA for Raj Laxmi Enterprises, replacing manual/paper-based attendance logging for employees Implemented real-time synchronization using Ratchet, achieving update latency under 1 second consistently across sessions.
- Designed the Supabase backend schema for shift scheduling, clock-in/clock-out records, and attendance history, enabling real-time tracking without a native app install.
- Delivered end-to-end as a client project — gathered requirements directly from ownership, iterated on UI/UX, and shipped a production tool currently in active use at the business.
- **Tech Stack**: PHP, MySQL, HTML, CSS, JavaScript, WebSocket using Ratchet

TRAINING

Web & App Developer (Part-time) — Raj Laxmi Enterprises | Proofs — Jun 2026 - Jul 2026

- Digitized retail operations including inventory management, data entry, and financial record-keeping on Marg ERP for a multi-brand FMCG distribution business.
- Designed and built Shift Pin, a geofenced staff-attendance PWA featuring automatic check-in/check-out, device-binding security, and a live admin dashboard for attendance and payroll tracking. Conducted detailed user research activities and translated key insights into actionable design requirements clearly.
- Generated ₹32,000 in consolidated revenue over a one-month engagement (22 June – 22 July 2026) through combined technical and operational contributions.

CERTIFICATES

- Android Bug Bounty | **Ec-Council** 2025
- Ethal Hacker | **Cisco** 2026
- Introduction to Cybersecurity | **Infosys** 2026

ACHIEVEMENTS

- Solved 50+ programming problems on online coding platforms during regular practice and learning(leetcode and hackerrank individually).
- TryHackMe top 15%
- Ranked **Top 5 among 80+ teams** in a NITJ CTF Competition.
- Ranked Top 20 among 800+ registration in College Hackathon.

EDUCATION

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 8.33*** — *Aug 2025 - Present*
- **Gita Niketan Awasiya Vidyalaya** — Kurukshetra, Haryana
  Higher Secondary Education; ***Percentage: 80.07%*** — *May 2023 - April 2025*
- **D.A.V Public School** — Samastipur , Bihar
  Secondary Education; ***Percentage: 81.04*** — *Jun 2022 - Mar 2023*
